

Bank Loan Analysis Report

Comprehensive analysis of 38,576 loan records to evaluate lending performance, borrower behavior, and credit risk patterns.

Dataset Overview

38,576

Total Records

Complete loan dataset analyzed

24

Features

Data points per loan

3

Loan Status

Fully Paid, Current, Charged Off

Key categories include loan information (amount, interest rate, term), borrower details (income, employment, ownership), and performance metrics (payments, verification status).

Loan performance loan

Split comparisons

Good loan

On-time payment default rate

Loan Performance

Full loan portfolio risk profile

Good vs Bad Loan Performance

Good Loans

86.2% of total loans

- 33,243 applications approved
- \$370.2M funded amount
- \$435.8M received in payments
- 11.64% average interest rate

Bad Loans

13.8% of total loans

- 5,333 charged off applications
- \$65.5M funded amount
- \$37.3M received in payments
- 13.88% average interest rate

Monthly Trends & Seasonality

Loan applications show consistent monthly growth, with December showing strongest performance. Month-over-month growth of 6.9% in applications and 13% in funding.

Top Performing States

California

\$78.5M funded
6,894 applications

New York

\$42.1M funded
3,701 applications

Texas

\$30.0M funded
2,773 applications

Florida

\$15.5M funded
1,355 applications

Top performing states in banking

California, New York, Texas, Florida
Other states: Washington, Oregon, Idaho, Utah, Arizona, Nevada, Montana, Wyoming, Colorado, New Mexico, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Maryland, Delaware, Pennsylvania, New Jersey, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, Maine, New Brunswick, Nova Scotia, Prince Edward Island, New Brunswick, Nova Scotia, Prince Edward Island, New Brunswick, Nova Scotia, Prince Edward Island.

Loan Term Analysis

36-Month Terms

\$273M funded across 28,237 loans

60-Month Terms

\$162.7M funded across 10,339 loans

Key Insight

Shorter 36-month terms dominate the portfolio with higher funding amounts and lower risk profiles.

Employment Length Impact

23%

10+ Years

8,870 applications, \$116M funded

11%

2 Years

4,382 applications, \$45M funded

8%

3 Years

4,088 applications, \$44M funded

12%

0 Years

4,575 applications, \$44M funded

Employment length significantly influences loan performance, with longer tenure correlating to better repayment behavior.

Loan Purpose Distribution

Debt Consolidation

18,214 applications
\$232.5M funded
55.8% of portfolio

Credit Card

4,998 applications
\$58.9M funded
14.3% of portfolio

Home Improvement

2,876 applications
\$33.4M funded
8.2% of portfolio

Other Purposes

3,824 applications
\$31.2M funded
7.6% of portfolio

Home Ownership Analysis

Rent

18,439 borrowers renting homes

Mortgage

17,198 borrowers with mortgages

Own

2,838 homeowners with no mortgage

Home ownership status shows correlation with loan performance, with mortgage holders showing strongest repayment rates.

Key Business Recommendations

Risk Management

Implement stricter approval criteria for high DTI borrowers and monitor charged-off loans for early warning signals.

Lending Strategy

Focus on low-risk segments with stable employment and lower DTI ratios. Optimize interest rates based on risk profiles.

Portfolio Optimization

Diversify across purposes and regions. Reduce exposure to high-risk loan categories.

Operational Improvements

Enhance data collection for better risk modeling. Automate loan monitoring using real-time dashboards.
